technical-professional high school

Public Accounting — 4 semesters
completed, ECAS

PROFILE

Full-stack developer and AI-driven builder focused on taking digital products from idea to production: marketplaces, e-commerce, document automation and AI-generated content. Founder of ConectaVet, a legally incorporated veterinary startup in Chile. I combine development (Next.js, React, Supabase) with automation (Node.js, Python) and AI tooling (Claude Code, Higgsfield, Kling AI) to ship complete, reliable solutions on time.

EXPERIENCE

Full-Stack Developer — Own products & freelance work

March 2026 – Present

- **ConectaVet (Founder):** veterinary marketplace in production (Next.js, React, Supabase); legally incorporated company (SpA, Chile).
- **NAILA Business Evolver (client, Spain):** multilingual landing page and online store (ES/EN/DA); custom organizational management tool built for their client, Grupo Prodesco, with automatic contract and proposal generation.
- **Obsidiana:** fashion e-commerce store with a custom admin panel (Supabase) and WhatsApp checkout.
- **VitalPlus:** online store plus a self-built pipeline for AI-generated ad videos for TikTok and Instagram.
